

## **Bee Well Pediatrics Appointments Effective Monday March 16, 2020:**

This is our plan to continue to provide medical care to our newborns, infants, and kids in Houston, but also to do our part and limit the spread of COVID 19. We are continuing to follow the Center for Disease Control (CDC) and Harris County Medical Guidelines as well. The safety of our patients and our staff is our top priority at Bee Well Pediatrics.

1. All appointments are still being seen. When you come to the office, please only 1 adult come in to check your child in and return to your car until an exam room is open that you can go straight to; this will limit exposures in the waiting room. Especially, since our patient population likes to touch and taste everything.
2. We do not have testing for coronavirus in our office.
3. Our staff and/ or myself may be wearing masks to protect you and us. We are taking extra precautions so that we can continue to care for your family right now when you need us most.
4. Please do not bring extra people or siblings to appointments. 1 parent per child.
5. No food or drinks allowed in the office. We are trying to limit eating, dirty hands, and increased bathroom usage.
6. Do not hesitate to call us with any questions. We are trying to see everyone we can and keep everyone healthy at the same time.

Most of all, we will strictly adhere to cleanliness and infection control in all areas of the office. Each exam room will be disinfected between patients.

This is a time to think smart. We are doing this as extra precautions so that we can keep all of our families safe. This is our part and efforts to flatten the curve for all of us. We are ready to help you navigate this pandemic together.

Lara Varisco Leonhardt, MD

Bee Well. Live Well.
